PROFILE

I hold a degree in Software Engineering with a specialization in AI, and I am proficient in MS Office, MS Project, and have intermediate English (B2). I am also proficient in major and advanced web and desktop programming languages, teamwork tools like Jira, and version control systems such as Git and Bitbucket. I have over a year of experience working with companies in the area of software programming and development. I am currently interested in pursuing a professional career as a software developer.

PROFESSIONAL EXPERIENCE

EYTLR

Nov 2025 - Actualidad

IT services and consulting.

FullStack Developer, QA, Software Architect y Devops

- Automation
 - Development of bots with Python, using Playwright and Selenium, for web scraping and data collection, for use in controlled environments and software (Revit) with a specific purpose.
- AI
 - Use of OpenAI and Anthropic for information processing, storage, and restructuring at the system's internal level.
 - Handling of Haiku, Sonnet, and GPT.
- Frontend development
 - Analysis and development of structures and interfaces at a monolithic level and as a microfront, in technologies and frameworks such as **Angular, React, Nextjs, Javascript, Typescript and Html**.
 - Integration of libraries such as tailwindcss and Bootstrap.
- Backend development
 - Development of **REST API and WebSocket** endpoints for real-time communication using languages and frameworks such as **NestJS, Java, Node.js, and SpringBoot**.
 - Development and integration of microservices.
- Data base
 - Development in **PostgreSQL and MS SQL Server**, analysis of data structure and flow, and database-level programming for simpler functions without exposing the data, creation of functions, triggers, stored procedures, and sequences.
- DevOps and deployment
 - Creation and configuration of an instance in **AWS with Nginx and Docker**, for the deployment of front and back projects.
- Version control
 - Project and repository management in **Git and GitHub** with one or more collaborators, considering development versions and handling different branches to avoid collisions.

Zoluxiones

Oct 2025 - Nov 2025

IT services and consulting.

Full Stack Developer

- UTP:
 - **Activities performed:**
 - Development of user stories for the assigned project, using the React and Nest.js frameworks.
 - Analysis and solution of related problems.
 - Backend programming with Nest.js.
 - Frontend programming with React.
 - **Projects:**
 - Silbia.
- Technologies used:
 - React.
 - JavaScript.
 - Figma.
 - Azure DevOps.
 - Coverage Cloud.
 - Confluence.
 - Jira.
 - Git.
 - TypeScript.

Centers Developer

- **NTT Certifications:**
 - Course and specialization in web development and management with Angular and Angular CLI.
 - Integration course for development with AI.
 - Enterprise-level AI management.
 - AI conduct and behavior at a professional level.
- **Pacifico seguros:**
 - **Activities performed:**
 - Vulnerability correction.
 - Code version management (GitHub).
 - Dependency updates (primary and transitive).
 - Code verification (security standards and development best practices).
- **Scotiabank:**
 - **Activities performed:**
 - Design and implementation of a Multi-Select component in React.
 - Development of a reusable component with search and multi-selection, integrated into various maintenance screens (users, roles, categories, etc.).
 - Form optimization through interface standardization and reduced development time.
 - Adapted to the project's stack and aligned with best practices for decoupled and reusable components.
 - **Projects:**
 - Kronos.
- **Technologies used:**
 - React.
 - JavaScript.
 - Bitbucket.
 - Jenkins.
 - Jira.
 - Git.
 - TypeScript.

Programmer Analyst

- **Scotiabank:**
 - **Highlighted technical responsibilities:**
 - **Deployment and DevOps:**
 - Management and automation of server deployments (Anthos, IIS).
 - Environment administration using Docker files, Nginx, and deployment manifests.
 - Control and monitoring of CI/CD pipelines (Jenkins, Argo).
 - Advanced configuration of integration environments, code injection controls, and validations in Pull Requests and merges.
 - **Version Control and Project Management:**
 - Efficient use of Bitbucket for version control and Git workflows.
 - Activity tracking and agile task management via Jira.
 - **Frontend Development and Architecture:**
 - Web application development with React, integrating components and structures provided by the organization.
 - Implementation and adaptation of Micro Frontends and Microservices to ensure modularity and scalability.
 - Handling of local development environments with Vite and Webpack.
 - Unit and integration test development with Jest.
 - UI and interface design with SCSS and component modularization using TypeScript.
 - **Integration and Back-End:**
 - Verification and integration of back-end functions developed with Spring Boot.
 - Service consumption and standardization according to internal organizational policies.
 - **Leadership and Training:**
 - Technical leadership of development teams and support in key stages of the software development lifecycle.
 - Training teams in the implementation of shared components (e.g., Staff Login) and deployments across different environments.
 - Implementation of Super Login as a centralized authentication mechanism in Profile Manager.
 - **Database:**
 - Database management with Microsoft SQL Server, ensuring data integrity and availability.
 - **Projects:**
 - Kronos.
 - Cavali.
 - Scotia Correo.

- Scotia Spool.
 - Valorados.
 - Scotia Transfer.
- **UNNA - Metropolitano Line 1.**
 - Web development with React (maintenance modules and components).
 - Back-end function verification (Nest.js).
 - API consumption from the web.
 - Version control (Git).
 - Activity management (Jira).
 - API documentation (Swagger).
 - Unit testing with Jest.
 - Implementation of Super Login and management of authentication processes.
- **Valtx - Intranet.**
 - Web development using Next.js (maintenance modules, landing pages, and components).
 - API consumption.
 - Deployment on a private Linux server.
 - Database management.
 - Back-end verification (Nest.js).
 - Version control (Git).
 - Database management (MongoDB, MySQL, PostgreSQL).
- **Valtx - Training.**
 - AS400 management.
 - COBOL handling for specific instructions.
 - Code review for structural modifications.
 - Development of basic functions.
- **Part of the Software Factory (Skills)**
 - Genexus 8, 9 and 18.
 - Genexus 16 for Bantotal.
 - Bantotal.
 - BTServices.
 - Descartes.
 - Java.
 - SpringBoot.
 - JavaScript.
 - TypeScript.
 - Node.
 - React.
 - MongoDB
 - PostgreSQL.
 - MS SQL Server
 - Next.js
 - Nest.js
 - Swagger
 - jest
 - Tailwind.
 - Git
 - Bitbucket
 - Jira
 - Cobol
 - AS400

Argosal E.I.R.L.

Sep 2022 - Mar 2023

Telecommunication services sales and support.

Full-Stack Programmer Analyst

- Back-end developer in PHP and JavaScript.
- Front-end developer in JavaScript.
- Database manager and analyst.
- Consumption of Reniec API.
- SQL Server, MySQL, and Firebase databases.
- Sales advisor and customer support in the telecommunications sector.
- Git version control management.

NeonHouseLed S.A.C

Feb 2022 - May 2022

Company specializes in developing control systems for various businesses.

Web Programmer Analyst

- Back-end developer in PHP.
- Front-end development with CSS.
- Git version control management.

Representaciones Digitales Darw E.I.R.L.

Company dedicated itself to selling and maintaining office equipment.

Jun 2021 - Dec 2021

Maintenance Technician and Full-Stack Web Programmer Analyst

- Back-end development in Java.
- Front-end development in Java.
- Office equipment maintenance technician.
- Customer service.
- Git version control management.

EDUCATION

Technological University of Perú

Civil Engineering, 7th semester.

Mar 2023 - Present

National Training Service in Industrial Work (SENATI)

Software Engineering with Artificial Intelligence, Graduate.

Feb 2020 - Dec 2022

ADDITIONAL INFORMATION

- Intermediate level of English (B2).
- Intermediate to advanced level of proficiency in Microsoft Office.
- B1 English Certificate – English Score Core Skills, British Council 2024.
- Partner Certificate: PCAP - Programming Essentials in Python, Cisco 2020.
- Certificate in Introduction to Cybersecurity, Cisco 2020.
- Certificate in Introduction to IoT, Cisco 2020.
- Certificate in Entrepreneurship, Cisco 2020.
- Certificate in Get Connected, Cisco 2020.
- Genexus 9 - Valtx Sep - Oct 2023.
- Genexus 18 - Valtx Oct - Nov 2023.
- Genexus 16 for Bantotal - De Larrobla & Asociados Nov - Dec 2023.
- Angular, Angular CLI – New Horizon Perú - Aug - Sep 2025.
- Passion for basketball, martial arts, and programming.
